# Programme Specification

**Title of Course:** *BSc (Hons) Economics*

Date first produced	31/03/2013
Date last revised	28/02/2025
Date of implementation of current version	01/09/2025
Version number	8
Faculty	Faculty of Business and Social Sciences
Cross-disciplinary	
School	School of Law, Social and Behavioural Sciences
Department	Department of Economics
Delivery Institution	Kingston University

This Programme Specification is designed for prospective students, current students, academic staff and employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if they take full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes and content of each modules can be found in the course VLE site and in individual Module Descriptors.

## SECTION 1: GENERAL INFORMATION

Award(s) and Title(s):	BSc (Hons) Economics
Exit Award(s) and Title(s):	Cert HE Economics Dip HE Economics Ordinary degree Economics
Course Code <i>For each pathway and mode of delivery</i>	N/A UFECO1ECO02
UCAS code <i>For each pathway</i>	L100

Award(s) and Title(s):	BSc (Hons) Economics with Foundation Year
Exit Award(s) and Title(s):	
Course Code <i>For each pathway and mode of delivery</i>	N/A UFECO1ECO55
UCAS code <i>For each pathway</i>	

Awarding Institution:	Kingston University
Teaching Institution:	Kingston University
Location:	Penrhyn Road
Language of Delivery:	English
Delivery mode:	Primarily campus based (up to 20% of scheduled L&T hours delivered online)
Learning mode(s):	Part-time Full-time
Minimum period of registration:	Part-time - 6 Full-time - 3
Maximum period of registration:	Part-time - 12 Full-time - 6
Entry requirements	The minimum entry qualifications for the programme are: From A levels: 112 BTEC: National Diploma: Merit, Merit, Merit

	<p>QCF Extended Diploma: Distinction, Merit, Merit QCF Diploma: Distinction*, Distinction</p> <p>Access Diploma: Pass in appropriate subject Plus: GCSE (A*-C) English Language and Mathematics</p> <p>A minimum IELTS score of 6.5, TOEFL 88 or equivalent is required for those for whom English is not their first language. <b>CRB clearance will not be required.</b></p>
Regulated by	The University and its courses are regulated by the Office for Students
Programme Accredited by:	N/A
Approved Variants:	n/a
Is this Higher or Degree Apprenticeship course?	No

## SECTION 2: THE COURSE

### A. Aims of the Course

The **BSc Economics** field offers a broad education in economic theory and its application in a wide range of policy areas. It is designed to prepare graduates both for further study and for immediate progression in a wide range of career paths in not only in business but in government and other policy-making bodies. Thus, it is offered only as a single honours programme.

Specialist skills in economic analysis are attained through teaching programmes designed to enable students from any area of previous study to progress.

In common with other economics fields at Kingston it is pluralistic in its openness to different theoretical perspectives. This approach is informed by the breadth of research interests of the teaching staff, which range from mathematical analysis to political economy.

Core modules in macro- and micro-economics and quantitative methods at Level 5 are supplemented by the field core module Contemporary Issues in Economics, the syllabus for which will evolve in step with developments in the real-world economy.

At Level 6 the field core module, Advanced Economic Policy and Principles, will likewise develop as economic thinking evolves from the current mainstream curriculum.

All students take a capstone module at Level 6 that both offers experience in independent investigation of a chosen topic and develops expertise in the communication of economic ideas.

The range of modules provides a good preparation for postgraduate work in economics and cognate disciplines, and is a strong foundation for a wide range of careers in both public policy areas and private sector organisations.

The programme will also be available as a 4 year 'sandwich' course with the addition of a placement year. Students taking up this option will be offered support in seeking placements by Careers and Employability Services through their Placement and Internships Preparation Programme. In addition, students will come back to Kingston for several 'Keep in touch' (KIT) days over the duration of their placement year. KIT days will give students on placement the opportunity to share learning and reflect, whilst also undertaking some professional development training and maintaining contact with their peer group.

Students may also choose to study abroad, normally for one year in Level 5, either in Europe, through the Erasmus scheme, or outside Europe at universities with which Kingston has reciprocal arrangements. It is also possible for them to participate in the Kingston Language Scheme.

All undergraduate Economics Fields aim to offer students a broad basis in Economics while at the same time allowing specialisation in particular areas of application to the degree that meets students' interests, aptitudes and career plans. This is achieved by providing a common foundation for single-honours BSc programmes at Level 4, with emphasis on the chosen specialisation increasing as students progress through Levels 5 and 6.

Students are offered a coherent set of core and elective modules intended to provide an enjoyable course of study that both promotes insight into the operation of economic systems and improves employment prospects after graduation.

All students are exposed to the core topics of economics and the associated analytical skills, and encouraged to develop skills in problem solving, in reading economic papers, and in using important sources of quantitative and qualitative information, including bibliographic information.

The aims of all fields are to:

- provide students from a wide range of backgrounds with a rounded experience of economics as an academic subject

- encourage analytical thinking
- develop an appreciation of the economic dimensions of wider social and political issues
- establish a sound foundation for careers in the wide range of fields in which an economics background is of advantage
- provide a suitable foundation for further study of economics and/or related areas
- equip students to appreciate the contribution of contending theoretical perspectives, and to keep abreast of future developments in the field.

#### **Level 4**

This provides a common foundation for full-field students in which they

- are introduced to core principles of analysis in macro- and micro-economics
- develop key study skills and begin active personal and professional development planning as part of a small group meeting with a personal tutor
- encounter the approaches specific to each of the three single-honours programmes
- develop a common identity as a community of economists, regardless of their particular intended specialisation.

Students who have completed Level 4 are thus in a position to change their chosen specialism, if desired, in the light of their developing interests and aptitudes.

#### **Level 5**

Entry to Level 5 confirms a student's programme, defined by the core module

**Contemporary Issues in Economics**, which develops the ability to apply economic analysis to a range of current economic problems and the contending policies advocated to remedy them.

This emerging specialism is supported by further development of core economic principles in macro- and micro-economics and in mathematical and statistical methods.

#### **Level 6**

At Level 6, the core course-specific module **Advanced Economic Policy and Principles** considers recent developments in micro- and macroeconomic theory and policy, incorporating market imperfections and institutions into formal models.

In the "capstone" module, **Working as an Economist**, students write a 5,000-word extended essay on a topic in their specialism.

## **B. Programme Learning Outcomes**

The programme learning outcomes are the high-level learning outcomes that will have been achieved by all students receiving this award. They have been aligned to the levels set out in 'Sector Recognised Standards in England' (OFS 2022).

Programme Learning Outcomes					
	Knowledge and Understanding		Intellectual Skills		Subject Practical Skills
	On completion of the course students will be able to:		On completion of the course students will be able to		On completion of the course students will be able to
A2	Apply economic analysis to issues of government policy and commercial and public sector practice	B4	critically analyse and appraise both primary and secondary economic data, and compare and evaluate economic arguments	C1	prepare essays, reports, and a critical literature review
A3	Use relevant quantitative methods and computing techniques and verbal, graphical, mathematical and econometric representation of economic ideas and analysis	B1	appreciate the complexity and diversity of modern economies	C2	use computer software to display, analyse and evaluate economic data
A4	Explore the meaning and significance of alternative economic policies within a wider social and political context	B2	engage in abstract thinking and concept building and apply their conceptual knowledge to real world phenomena	C3	use audio visual material appropriately for presentations
A5	appreciate the contribution of contending theoretical perspectives, and keep abreast of future developments in the field	B3	synthesise information and use it to sustain an argument, formulate and test hypotheses, and reach systematically reasoned conclusions	C4	Work effectively with peers in group projects
A1	Undertake economic analysis and use that analysis for problem solving and decision making				

### C. Future Skills Graduate Attributes

In addition to the programme learning outcomes, the programme of study defined in this programme specification will engage students in developing their Future Skills Graduate Attributes:

1. Creative Problem Solving
2. Digital Competency
3. Enterprise
4. Questioning Mindset
5. Adaptability
6. Empathy
7. Collaboration
8. Resilience
9. Self-Awareness

### D. Outline Programme Structure

Each level is made up of four modules each worth 30 credit points. Typically a student must complete 120 credits at each level. All students will be provided with the University regulations. Full details of each module will be provided in module descriptors and student module guides.

For information on Foundation degree modules, please refer to the Foundation Year in Social and Behavioural Sciences programme specification.

### BSc (Hons) Economics

Level 4							
BSc (Hons) Economics							
Core modules	Module code	Credit Value	Level	Teaching Block	Pre-requisites	Full Time	Part Time
Becoming an Economist	EC4001	30	4	1 & 2			
Capitalism	EC4002	30	4	1 & 2			
Economic Policy and Principles	EC4003	30	4	1 & 2			
Economics Quantitatively Treated 1	EC4004	30	4	1 & 2			

Exit Awards at Level 4

This course permits progression from Level 4 to Level 5 with 90 credits at Level 4 or above. Progression to level 5 requires passes in EC4003 and EC4004. Students exiting the programme at this point who have successfully completed 120 credits are eligible for the award of Certificate of Higher Education.

<b>Level 5</b>							
<b>BSc (Hons) Economics</b>							
<b>Core modules</b>	<b>Module code</b>	<b>Credit Value</b>	<b>Level</b>	<b>Teaching Block</b>	<b>Pre-requisites</b>	<b>Full Time</b>	<b>Part Time</b>
Contemporary Issues in Economics	EC5001	30	5	1 & 2			
Economics Quantitatively Treated 2	EC5002	30	5	1 & 2			
Macroeconomics	EC5003	30	5	1 & 2			
Microeconomics	EC5004	30	5	1 & 2			

#### Exit Awards at Level 5

Progression to level 6 requires passes in all modules.

Students exiting the programme at this point who have successfully completed 120 credits are eligible for the award of Diploma of Higher Education.

<b>Level 6</b>							
<b>BSc (Hons) Economics</b>							
<b>Core modules</b>	<b>Module code</b>	<b>Credit Value</b>	<b>Level</b>	<b>Teaching Block</b>	<b>Pre-requisites</b>	<b>Full Time</b>	<b>Part Time</b>
Advanced Economic Policy and Principles	EC6002	30	6	Year long		3	7
Development Economics	EC6010	15	6	TB1		3	7
Future Skills Apply	AX6001	15	6	TB2		3	7
International Trade and Finance	EC6007	30	6	Year long		3	7
Working as an Economist	EC6001	30	6	Year long		3	7

## BSc (Hons) Economics with Foundation Year

### E. Teaching, Learning and Assessment

This field has been designed to take account of the KU Curriculum Design Principles. The course utilises a wide range of teaching and learning methods that will enable all students be actively engaged throughout the course.

Special emphasis is placed on early acquisition of personal development and academic skills in the context of economic discourse, and each student's development as an independent learner is backed by individual support through a personal tutor system.

Final status as a fully-independent learner who can apply economic understanding in professional work is achieved at Level 6, where all students work on individually-chosen topics informed by the research interests of the economics staff, and present their results to peers as well as to staff.

#### Level 4

All students take a small-group tutorial module, **Becoming an Economist**. Students meet weekly as a group with their personal tutor for a variety of activities addressing learning skills both directly and through work on substantive material on economics. Assessment for this module is by two portfolios. The first is a synoptic assessment of economic principles and methods comprising individual and group work in the form of written reports and personal presentations.

The second portfolio is designed as the foundation of personal development planning (PDP) by students. It evidences student engagement and includes reflections on their individual learning styles and skills, responses to the feedback provided on assessed work in all Level 4 modules, and a curriculum vitae. This work is not graded, but presentation of a satisfactory portfolio is a gateway requirement for passing the module.

Teaching and learning methods are carefully crafted to suit the content and the learning outcomes of the module. Through a variety of group and seminar work, and practical sessions students are given the opportunity to develop more individual interests and personal and key skills.

A range of assessment methods will be used that enables students to demonstrate the acquisition of knowledge and skills. Methods include course work, oral presentations, in-class tests, MCQs, examinations and poster presentations.

#### Level 5

The emphasis at Level 5 is on developing core knowledge and skills in economics as a whole, as well as those immediately relevant to students' chosen specialism. Professional practice in economics of skills requires skills in formal mathematical analysis and in statistical evaluation of evidence, and this is recognised in the workshop format used for learning activities in the relevant module.

Support from personal tutors is available as needed throughout the year, but is particularly focussed on review of personal progress at the start of the academic year (here the PDP portfolio is a key reference), and again toward the end of the

year when students are encouraged to begin planning not only for the final phase of their undergraduate career but for progression to employment or further study.

### **Level 6**

All Level 6 students take a “capstone” module, **Working as an Economist**. As its name suggests, it bookends the journey begun by students in the Level 4 tutorial module, allowing them to demonstrate the knowledge and skills that they have acquired throughout the course.

The topic of the project will be negotiated with the Project Tutor within themes set each year in the light of staff teaching and research interests. The capstone project also allows students to develop their research skills and provide them with the foundations for further study if they wish to pursue it.

### **Technology-enhanced learning**

All modules are supported by learning materials posted on Canvas, the University’s Virtual Learning Environment.

As well as links to module guides and other organisation materials, and to in-house materials such as lecture notes, Canvas provides links to external study materials provided by the Economics Network (<http://www.economicsnetwork.ac.uk/resources>) and commercial publishers, to simulations and animations and to sets of data for statistical analysis.

All students receive teaching and support in the use of standard business productivity software (word processing, spreadsheets, presentation management), bibliographic database programs, and a range of specialist software for statistical analysis.

Students are actively engaged through online discussion, collaboration and contribution using tools such as discussion boards, blogs and wikis, achieved through both institutional tools and third party social media as appropriate.

The assessment regime for each module has been designed to provide formative opportunities that allow students to practice and to receive feed forward on their performance in preparation for the summative assessment. Care has been taken to avoid assessment bunching.

The development of academic skills is threaded throughout the course and assessed both formatively and summatively. Diagnostic testing will be utilised to test progress in the development of these skills but also to identify where students may need additional support which may come via the Centre for Academic Skills and Employability or other tailored support.

## **F. Support for Students and their Learning**

Students are supported through a range of services that provide academic and wider support. These include:

- A Module Leader for each module
- A Course Leader to help students understand the course structure
- Personal Tutors to provide academic and personal support
- Technical support to advise students on IT and the use of software
- Student Voice Committee – to ensure the views of students are heard
- Canvas – Kingston University’s Virtual Learning Environment
- Student support facilities that can provide advice on issues such as finance, regulations, legal matters, accommodation, international student support

- Disabled student support
- The Kingston Students' Union
- Student Development and Graduate Success

## G. Ensuring and Enhancing the Quality of the Course

The University has policies and procedures for evaluating and improving the quality and standards of its provision. These include:

- Continuous Monitoring of courses through the Kingston Course Enhancement Programme (KCEP)
- Student evaluation including Module Evaluation Questionnaires (MEQs), the National Student Survey (NSS)
- Internal and external moderation of graded assignments

## H. External Reference Points

External reference points which have informed the design of the course. These include:

- PSRB standards
- QAA Subject benchmarks
- Other subject or industry standards

## I. Development of Course Learning Outcomes in Modules

This table maps where programme learning outcomes are **summatively** assessed across the **core** modules for this course. It provides an aid to academic staff in understanding how individual modules contribute to the course aims, a means to help students monitor their own learning, personal and professional development as the course progresses and a checklist for quality assurance purposes.

Module Code		Level 4				Level 5				Level 6				
		EC4004	EC4003	EC4002	EC4001	EC5001	EC5002	EC5004	EC5003	EC6001	EC6010	AX6001	EC6007	EC6002
Knowledge & Understanding	A2		S			S		S	S	S			S	S
	A3	S	S			S		S	S	S			S	S

	A4			S		S				S			S	S
	A5		S	S		S		S	S	S			S	S
	A1		S	S		S		S	S	S				S
<b>Intellectual Skills</b>	B4			S						S			S	S
	B1			S		S	S			S			S	S
	B2		S			S	S			S			S	S
	B3	S		S			S			S				S
<b>Practical Skills</b>	C1			S		S				S				
	C2						S			S				
	C3						S			S				
	C4						S			S				

**Students will be provided with formative assessment opportunities throughout the course to practise and develop their proficiency in the range of assessment methods utilised.**

**Additional Information**
