# Programme Specification

**Title of Course:** *MSc Finance*

Date first produced	30/09/2012
Date last revised	04/06/2025
Date of implementation of current version	02/09/2024
Version number	10
Faculty	Faculty of Business and Social Sciences
Cross-disciplinary	
School	Kingston Business School
Department	Department of Accounting, Finance and Informatics
Delivery Institution	Kingston University

This Programme Specification is designed for prospective students, current students, academic staff and employers. It provides a concise summary of the main features of the programme and the intended learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if they take full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes and content of each modules can be found in the course VLE site and in individual Module Descriptors.

## SECTION 1: GENERAL INFORMATION

Award(s) and Title(s):	MSc Finance
Exit Award(s) and Title(s):	Pg Cert Finance Pg Dip Finance
Course Code <i>For each pathway and mode of delivery</i>	n/a PFFIN1FIN01
UCAS code <i>For each pathway</i>	

Awarding Institution:	Kingston University
Teaching Institution:	Kingston University
Location:	Kingston Business School, Faculty of Business and Social Sciences, Kingston Hill
Language of Delivery:	English
Delivery mode:	
Learning mode(s):	Part-time Full-time
Minimum period of registration:	Part-time - 2 Full-time - 1
Maximum period of registration:	Part-time - 4 Full-time - 2
Entry requirements	Kingston University typically uses a range of entry requirements to assess an applicant's suitability for our courses. Most postgraduate taught course requirements are based on having been awarded a relevant undergraduate degree and are normally coupled with minimum grades expectation of 2:2, specific courses in certain areas may have a stricter grade requirement. We may also use interview, portfolio and performance pieces to assess a person's suitability for some courses. We recognise that every person's journey to a postgraduate taught education is different and unique and in some cases we may take into account work experience and other non-standard pathways onto University level study. Additionally, all non-UK applicants must meet our English language requirements.

	Please see our course pages on the Kingston University website for the most up to date entry requirements.
Regulated by	The University and its courses are regulated by the Office for Students
Programme Accredited by:	AACSB
Approved Variants:	This programme is approved to use 15-credit modules.
Is this Higher or Degree Apprenticeship course?	No

## SECTION 2: THE COURSE

### A. Aims of the Course

The MSc Finance programme is designed both for those who already have work experience in corporate finance and financial management and want to enhance and update further their knowledge and understanding, and for those graduates who wish to have a rewarding, exciting and challenging career in the area of corporate finance or financial consultancy.

Graduates from the programme are expected to progress to high ranking positions in corporate finance and financial management around the globe, work in relevant government bodies, or pursue a PhD. Thus, developing employable graduates is at the heart of this programme. The students have the opportunity to engage in work-related projects drawing on case studies and real-life scenarios, and modules are designed to develop the skills valued by employers, such as presentations, teamwork, problem solving and communication. This is achieved by embedding employability initiatives within the curriculum as well as designing appropriate assessment method to mirror real-life practices, e.g. preparation of financial statements, business plans, reports and summaries, so that students are exposed to opportunities that develop their skills on an ongoing basis. Students are also encouraged to reflect on their learning so they can articulate how the acquisitions of such skills relate to practice and how they can be developed in the future.

This programme is designed to offer knowledge and understanding of a unique combination of major contemporary theoretical and empirical developments in the area of corporate finance and the analysis and valuation of companies both from an accounting and financial perspective. It further develops the skills and ability to apply the knowledge and understanding in real-life corporate cases. The programme also covers financial statement analysis, financial engineering, fixed income analysis, and financial econometrics. A range of teaching and learning strategies are used on the programme – not only lectures and individual study but also a variety of group- and team-based activities via computer lab and Bloomberg terminal. Finally, the dissertation and research methods will equip student to conduct research independently.

Real life examples and case studies will be used extensively during the taught sessions and the assessments will also expose students to real life problems and solutions. The programme has a balanced approach between quantitative and qualitative methods, and will provide candidates with the computer and research skills required by employers in this highly competitive sector.

The programme also helps develop employment-ready students through an integrated business experience in the form of an optional work placement.

This integrated placement provides students with an exciting opportunity to apply and develop their knowledge and skills in a real-world setting and/or study in another country, both of which enable them to develop their self-confidence and strengthen their CV. Students undertaking such placement activities are in a stronger position to achieve their best in the final year of study, as well as gaining skills and experience that employers desire in today's business world.

The specific aims of this programme are:

- To expand students' knowledge and understanding of the issues, problems and ideas associated with finance and financial management by way of a

critical examination of the literature associated with these fields of academic enquiry

- To examine the objectives, role and scope of finance and financial management within the broader context of the global business environment and management To practice
- To explore how academic concepts, theory and the related empirical evidence in the fields of finance and financial management may be applied to advantage in a practical organisational context characterised by globalisation, complexity and unpredictability
- To develop students' knowledge and skills necessary for analysis and synthesis, and continuing professional development.
- To provide a critical examination of alternative research methods, to develop research skills and to provide the opportunity for course members to originate, to plan, to undertake and to present the findings of a substantial research project in the field of international finance.
- To give students a head start on the employment ladder, preparing them for employment, further study and lifelong learning.

## **B. Programme Learning Outcomes**

The programme learning outcomes are the high-level learning outcomes that will have been achieved by all students receiving this award. They have been aligned to the levels set out in 'Sector Recognised Standards in England' (OFS 2022).

Programme Learning Outcomes					
	Knowledge and Understanding		Intellectual Skills		Subject Practical Skills
	On completion of the course students will be able to:		On completion of the course students will be able to		On completion of the course students will be able to
A1	Demonstrate knowledge and a critical understanding of the core theoretical contributions to finance and how these may be applied to enhance management and professional practice in an international context	B1	Analyse, interpret and present financial data and information sources and demonstrate a critical awareness of the relevance and limitations of such analyses	C3	Communicate effectively in written and oral forms in English in a business context.
A2	Find and evaluate key findings from the related empirical research literatures	B2	Evaluate issues, problems and opportunities associated with finance and financial management and demonstrate how these functions bear on the activities of modern corporations and institutions	C1	Demonstrate skills of analysis and synthesis, and apply them to issues and decisions associated with finance and financial management, and also in the broader context of business and management
A3	Identify and explore the connections between the legal, economic and social environments as they bear on the finance operations	B3	Undertake critical self-reflection of the learning process and experience, and demonstrate how this reflection and learning can be utilised to enhance future performance	C2	Identify and utilise appropriate research strategies, methods and sources of data and information in order to formulate, design, manage and execute a substantial research project, and present and communicate the research findings in an appropriate form

A4	Identify the relative merits and disadvantages of various research methods and techniques and to achieve competence in the application of those methods and techniques				
----	--	--	--	--	--

### **C. Future Skills Graduate Attributes**

In addition to the programme learning outcomes, the programme of study defined in this programme specification will engage students in developing their Future Skills Graduate Attributes:

1. Creative Problem Solving
2. Digital Competency
3. Enterprise
4. Questioning Mindset
5. Adaptability
6. Empathy
7. Collaboration
8. Resilience
9. Self-Awareness

### **D. Outline Programme Structure**

The programme consists of seven modules of various weightings. Teaching blocks 1 & 2 each comprise one 30-credit and two 15-credit modules, TB3 contains a 60-credit research methods and dissertation module. A student must complete 180 credits for a Masters degree. All students will be provided with the University regulations. Full details of each module are provided in the module descriptors and student module handbooks.

Due to the nature of the degree, which provides students with a range of opportunities including the option to take a one-year work placement following the taught programme, the course is intensive and requires hard work and dedication. The programme has two starting points: September, starting in teaching block 1 (TB1), and January, starting in teaching block 2 (TB2). Students in each intake will have their modules in a different order, except for Financial Modelling and Data Analytics which will always run in the students' first teaching block, and Financial Statement Analysis which will always run in their second teaching block.

#### **Placement version**

Students on the 2-year placement version of the programme should complete all of their taught modules and their project and may work in their placement area for a maximum of 12 months. The student will be advised of the deadlines when by which they need to apply and have their placement confirmed. Students on placement must complete a portfolio assessment which includes a reflection on how the theories they have learnt during their teaching year has helped them in their placement and demonstrate ability to apply their teaching in a real business situation.

Level 7							
MSc Finance							
Core modules	Module code	Credit Value	Level	Teaching Block	Pre-requisites	Full Time	Part Time
Corporate Finance	BA7008	30	7	TB2		3	3
Dissertation and Research Methods	BB7023	60	7	TB3		1	2
Financial Econometrics	BA7011	15	7	2		1	2
Financial Engineering and Fixed Income Analysis	BA7012	30	7	1		1	2
Financial Modelling and Data Analytics	BA7006	15	7	1 and 2		3	3
Financial Statement Analysis	BA7007	15	7	1 and 2		3	3
Optional Modules							
Blockchain FinTech Applications	BB7030	15	7	1		1	1
Corporate Reporting and Investor Relations	BA7021	15	7	TB1		1	1
International Money and Finance	BA7020	15	7	TB1		1	1
Professional Placement	BA7777	120	7	TB3- TB1 – TB2		2	3

#### Exit Awards at Level 7

#### *PLEASE DELETE IF THERE ARE NO LEVEL 7 MODULES IN THIS COURSE*

Students exiting the programme with 60 level 7 credits are eligible for the award of Postgraduate Certificate.

Students exiting the programme with 120 level 7 credits are eligible for the award of Postgraduate Diploma.

(Where appropriate – specify if there are any core modules that students must achieve for either of the exit awards)

Please note pre-requisite requirements for master's courses should only be set where there are defined progression points in the course where assessment boards have ratified module outcomes.

## E. Teaching, Learning and Assessment

The approach to student learning is a reflection of the Learning and Teaching Strategy of the Faculty, which seeks to provide a learning experience from which all students gain optimum benefit.

Further, the teaching and learning strategies take cognisance of the QAA Benchmark Statements for Masters Awards in business and management. These statements make specific reference to the knowledge and understanding and a range of cognitive and intellectual skills, and specific techniques expected as outcomes in all Master's level awards.

Students on the MSc Finance programme seek and expect:

- a wide range of knowledge and understanding that is recognised by, *inter alia*, prospective employers
- transferable skills of analysis and synthesis which they will be able to utilise to enhance their future careers.

To meet these objectives in the context of a one-year programme devoted to finance requires flexibility in learning styles on the part of the students. It also requires flexibility in delivery and support for learning provided by the Course Team. Key resources for students include:

- tutor-led learning in formal lectures and classroom activities and directed learning undertaken outside formal class contact
- independent self-directed learning on the part of students
- use of study groups, including discussions and exercises outside of the classroom
- individual preparation of case materials and exercises
- peer group interaction and mutual support from other members of the cohort
- the facilities available through the Learning Resources Centre, including online bibliographic databases, financial databases, and other electronic media
- individual supervision by lecturers for the preparation of the dissertation
- the Canvas online Learning Management System including online discussion groups
- external guest speakers from other academic institutions, the professions, and the corporate sector.

The programme also makes extensive use of technology to enhance learning, including use of databases such as Bloomberg, Thomson, Datastream and FAME so that students have access to real world data; computer based student forums for students to discuss and post queries to their cohort to aid peer learning opportunities; and students are encouraged to use spreadsheets.

Student learning is facilitated by the use of a variety of these materials and structures. Lecturers direct learning by identifying appropriate reading, case materials, exercises and topics or scenarios for class discussion. They lead discussions, to ensure that key learning points are acquired. Lecturers also use

Canvas to provide additional materials as a means of engendering independent, collaborative and interactive student learning, and for communicating with students. The assessment strategy reflects the aims and learning outcomes of the programme. It is designed to assess the knowledge and skills essential to meet the overall requirements of a Masters degree, as well as the specific knowledge requirements of individual subject modules.

The purposes of the assessment strategy are to provide:

- appropriate formative assessments to enable students to develop and measure their knowledge, understanding, skills and capacities associated with a Masters degree in finance. Class and independent exercises allow students to have feedback on their understanding and application of knowledge.
- appropriate summative assessments to enable students to demonstrate their ability to apply theory, concepts, principles and empirical evidence to practice and to develop flexible, innovative, and conceptually robust solutions to problems in finance. One of the early assessments is used to specifically provide feedback on appropriate academic writing and referencing techniques to support the writing of future essays and the final dissertation.
- opportunities for students to utilise and apply their own experience in assessment
- an equitable, consistent and reliable measure of achievement and performance.

The summative assessment regime will utilise a variety of assessment methods and techniques in order to reflect the teaching and learning strategies employed. These will include:

- written analyses of case studies and *quasi* business reports, providing students with real life data and examples;
- traditional essays based on theoretical issues; reports and analyses, developing academic research and writing skills;
- formal presentations, developing skills and confidence in making presentations;
- formal examinations and objective testing to assess knowledge and application,
- a group assessment, providing students with the opportunity for peer learning and developing students' abilities to work as a team.

## **F. Support for Students and their Learning**

Each student is allocated a personal tutor. The role of the personal tutor is to support their tutees on their course of study, providing a contact who students can meet and discuss their progress, achievements and any concerns that they may have.

In addition to the personal tutor, students are also supported by:

- Module leader for each module
- A Course Director to help students understand the programme structure
- Technical support to advise students on IT and the use of software
- An induction session at the beginning of the programme
- Student Voice Committee

- FBSS Academic Skills Centre
- Canvas – a versatile on-line interactive intranet and learning environment
- Student support facilities that provide advice on issues such as finance, regulations, legal matters, accommodation, international student support etc.
- Disabled student support
- The Students' Union
- Careers and Employability Service
- The Careers and Employability Service team provides valuable guidance in supporting students with their placements
- Placement Tutor will visit during the placement and meet with the student and work place supervisor
- Guest speakers from other academic institutions, the professions and the banking sector
- Practical training on financial databases such as Bloomberg based trading, Datastream/Thomson One Banker, FAME.

## **G. Ensuring and Enhancing the Quality of the Course**

The University has several methods for evaluating and improving the quality and standards of its provision. These include:

- External examiners
- School Education Committee
- Annual review and development
- Periodic review undertaken at the subject level
- Student evaluation
- Moderation policies

## **H. External Reference Points**

External reference points which have informed the design of the course. These include:

- PSRB standards
- QAA Subject benchmarks
- Other subject or industry standards

## **I. Development of Course Learning Outcomes in Modules**

This table maps where programme learning outcomes are **summatively** assessed across the **core** modules for this course. It provides an aid to academic staff in understanding how individual modules contribute to the course aims, a means to help students monitor their own learning, personal and professional development as the course progresses and a checklist for quality assurance purposes.

Module Code		Level 7									
		BA7777	BB7030	BA7012	BA7011	BA7008	BA7006	BB7023	BA7020	BA7007	BA7021
Knowledge & Understanding	A 1		S	S	S	S	S		S	S	
	A 2		S	S	S	S	S		S	S	
	A 3		S	S	S	S	S		S		
	A 4			S	S		S		S		
Intellectual Skills	B 1		S	S	S	S			S	S	
	B 2		S	S	S	S	S		S	S	
	B 3		S		S		S		S		
Practical Skills	C 3						S				
	C 1		S	S	S	S	S		S	S	
	C 2			S	S	S	S		S		

Students will be provided with formative assessment opportunities throughout the course to practise and develop their proficiency in the range of assessment methods utilised.

#### Additional Information
